DFQ412BL DECORATIVE FRONT BARRIER - INSTALLATION

ATTENTION

Noncombustible finishing materials may be placed up to the Side Stone stops and Clean Face Hood. This should be completed prior to installing the DFQ412BL Decorative Front Barrier.

Please refer to "Finishing The Wall" section in the fireplace installation manual for detailed installation information.

1. Carefully unpack the Decorative Front Barrier assembly.
2. Locate the (2) Side Stone Stops and the Clean Face Hood.
3. Remove the Glass Door assembly before installing the stone stops and hood.
4. To install the side stone stops, loosen the top and bottom Phillips head screws located on the inside flanges of the fireplace opening. See Figure 1. Then align the slots in the side stone stops with the previously loosened screws. Re-tighten the two screws on each side stone stop to secure.

Figure 1

5. To install the Clean Face Hood, loosen the (7) hex head screws located across the top opening of the fireplace, then align and slide in the Clean Face Hood and retighten the screws to secure. (See Figure 2)

Figure 2

6. Re-install the glass door assembly.
7. To install the DFQ412BL Decorative Front Barrier kit, simply line up and engage the four tabs on the barrier front with the slots in the fireplace. **NOTE:** The top of the barrier frame is to be positioned under the clean face hood installation Step 5. (See Figure 3)

Figure 3

9. Installation complete.

DFQ414BL, DFQ41WBL, OR DFQ41WHP DECORATIVE FRONT BARRIER - INSTALLATION

1. Carefully unpack the Decorative Front Barrier assembly.
2. To install the Decorative Front Barrier kit, simply line up and engage the four tabs on the back of the barrier with the slots in the fireplace. (See Figures 4 & 5)
